

SYSTEM PROMPT DEL PERSONAJE - MATEO

[CHARACTER]:

A recurring child character for a children's visual-search project about Argentina.

Strongly stylized 3D stop-motion clay / plasticine character with a charming handcrafted miniature-puppet appearance.

Compact chibi proportions: oversized rounded head, very small and slightly chubby body, short chunky arms and legs, almost no visible neck, and a soft rounded silhouette. The anatomy should feel simple, playful and physically sculpted from clay rather than precisely modeled.

Warm light-to-medium tan skin tone.

Dark brown hair made from chunky, individually sculpted clay locks, slightly messy and tousled, with simple rounded shapes and subtle handmade irregularities, always keeping the face visible.

Very large rounded white eyes with tiny black pupils, simple dark eyebrows, a small rounded clay nose and a tiny gentle smile. Facial features should be extremely simple, expressive and cartoon-like, with the eyes integrated naturally into the rounded volume of the face.

Friendly, curious, calm and approachable expression.

The character carries a simple white backpack, ideally visible in full or at minimum through visible white shoulder straps whenever the outfit allows it.

The entire character must look physically hand-sculpted from soft plasticine, as if it were a miniature puppet created for a stop-motion animated film. Use chunky, soft and slightly imperfect clay forms rather than precise or geometrically perfect CGI modeling.

Skin, hair, clothing, shoes, backpack and every accessory should share the same tactile clay construction. Clothing should look sculpted from colored plasticine rather than made from realistic fabric. Hair should look like individually shaped pieces of dark clay rather than realistic hair strands.

Surfaces should show subtle handmade imperfections, gentle unevenness, soft sculpting marks and very subtle fingerprint-like texture. Materials should be predominantly matte to softly satin, with soft highlights that emphasize the rounded three-dimensional volumes.

Maintain strong three-dimensional depth and volume through soft modeling, gentle ambient shadows and warm animated-film lighting. The character should feel like a tangible miniature clay puppet photographed on a physical set, while remaining clean, colorful and highly readable.

The overall aesthetic should resemble a polished children's stop-motion clay animation: playful, tactile, expressive, warm and clearly handcrafted, while avoiding the appearance of a mass-produced toy or collectible figurine.

This character must always remain unmistakably the same person across all scenes.

[RESTRICTIONS]:

- Never change the face design
- Never change the eye shape or scale
- Never change the hair color or overall hairstyle
- Never change the skin tone
- Never make the character realistic

- Never give the character adult anatomy
- Never make the character tall, slim or proportionally realistic
- Never lose the white backpack entirely without a strong reason
- Never make the character look like a smooth vinyl toy, plastic collectible or polished CGI figurine
- Never use realistic skin, hair, fabric or clothing materials
- Never make the surfaces perfectly smooth or mechanically manufactured
- Never lose the handcrafted clay / plasticine appearance
- Never remove the subtle handmade sculpting texture and imperfections
- Never make the character unrecognizable due to an outfit or accessory

[OUTPUT FORMAT]:

Full body, neutral standing pose, on a pure white background, no scenery, no text.
